

Bell ICT

Matthew Bell

Helping our Clients to increase Productivity!

- **Computer Maintenance Support**
- **Computer Hardware**
- **Software Supply & Installation**
- **Virus Protection**
- **Cloud Backup & Cloud Servers**

Matthew has over 35 Years working in the Computer Industry and has seen and successfully delivered many changes from SME to Corporates.

Bell ICT Limited, is a team of dynamic professionals who are skilled in their respective disciplines.

Product and service offerings have expanded from supply, installation and support of computer networks to a broad range of data protection services relevant to Cyber Security.

Bell ICT offer a service and maintenance package that is structured to meet your exact needs and requirements. We ensure your IT infrastructure supports your business and that you have the most "up to date" and cost-effective systems available to maximise your business.

We have developed a number of highly specialised databases that offer our clients a targeted business solution for their business.
